

AMIRUL EHSAN BIN ROSLAN
SOFTWARE ENGINEER | MOBILE & WEB DEVELOPMENT | IT SUPPORT
amirulehsan347@gmail.com | +6011-39914460 | Kajang, Selangor | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Engineering graduate with hands-on experience in system development gained through internship and academic projects. Experienced in **developing** and **maintaining applications** using JavaScript, PHP, Flutter, Firebase, Java, and MySQL, with exposure to **system testing**, troubleshooting, and **deployment support**.

Holds a **Google Project Management Professional Certificate** and strong hands-on exposure to system design, **IT support**, **network configuration**, and **Agile practices**. Passionate about creating practical, user-centred solutions that bring value to users and businesses.

KEY SKILLS AND STRENGTHS

Programming Languages: JavaScript, Python, PHP, C++, HTML/CSS, SQL

Mobile Technologies: Flutter, Firebase

Backend & Database: MySQL, Firebase, REST API Integration (PlantNet, Plant.id)

Tools & Practices: Git, Figma (UI/UX), Agile/Scrum, Google Project Management, Unity 2D, Adobe Photoshop, Adobe Illustrator, Adobe Acrobat

Supporting Skills: System Analysis & Design, SDLC & Agile Development, Network configuration, IT support, Technical troubleshooting, System auditing

EDUCATIONAL BACKGROUND

Universiti Of Kuala Lumpur Bachelor of IT (Hons.) Software Engineering, Feb 2023 – Jun 2026, CGPA: 3.44

Politeknik Sultan Idris Shah Diploma in IT (Digital Technology), Jun 2019 – Feb 2022, CGPA: 3.79

WORK EXPERIENCE

Software Engineer Internship (IT Expert)

MyHanKukTV – Cyberjaya | Mar 2026– Jun 2026

- Designed and developed an internal broadcast **scheduling system (Showtime Manager)** using JavaScript, supporting daily TV programming operations.
- Built core features including schedule creation, **content management**, search functionality, and user interface workflows for **broadcast planners**.
- Delivered expert **technical support**, resolving complex issues to reduce downtime and enhance user satisfaction
- Enhanced social media strategy to increase engagement and brand visibility
- Documented IT procedures** and system configurations, ensuring consistency and knowledge sharing
- Tested, **debugged**, and optimised the application to improve performance, usability, and reliability.

Lane Marshal

U-Bowl-Alamanda – Putrajaya | Dec 2025 – May 2026

- Managed bowling lanes and seating to **optimise customer flow** and enhance overall experience.
- Monitored lane conditions** and coordinated with team members for efficient lane assignments and issue resolution.

Technician Computer

Sigma Rectrix Systems(M) – Cyberjaya | Jun 2021 – Mar 2023

- Installed and **configured network hardware** including routers, switches, and firewalls for company infrastructure.
- Managed firewall configurations and updates to prevent unauthorised access and maintain network integrity
- **Configured computer hardware** to meet specific operational requirements
- Diagnosed and resolved hardware and software faults across computers and peripheral devices.
- Set up testing procedures to validate system and **hardware performance** against technical requirements.
- **Maintained firewall** rules and security configurations to protect network integrity.

PROJECT

Showtime Manager System | MyHankukTV

Mar 2026 – Jun 2026

Tech Used: JavaScript, MySQL

- Built a **JavaScript web application** for broadcast schedule management with a 24-hour drag-and-drop timeline, featuring Gantt-style color-coded content blocks.
- **Structured content organisation** by type (Dramas, K-pop, Movies) with series and season hierarchy, and automated schedule reflowing to remove gaps and overlaps.
- Added real-time search, week navigation, and detailed info panels to support the **full broadcast planning workflow**.

SeedOfLife | Final Year Project Unkl

Mar 2025 – Jan 2026

Tech Used: Flutter, Firebase, PlantNet API, Plant.id API

- **Developed Firebase database integration and** improved UI/UX for an AI-powered plant care mobile app targeting urban users in Malaysia.
- Connected **PlantNet and Plant.id APIs** to enable real-time tropical plant identification and climate-based care scheduling.
- Designed system and chat flows, ran application testing, and built community forum and GPS nursery locator features.

CERTIFICATIONS

Google Project Management Professional Certificate

January 2025

EXTRA-CURRICULAR ACTIVITIES

Technical | (iCEP) Energy Asia 2025 Conference

KL Convention Centre | June 2025

- Assisted with all **technical requirements** on-site under the direction of the team lead.
- **Monitored and reported** IT issues based on priority levels (**Critical, High, Medium, Low**) to the iCEP Committee within stipulated response times.
